AWS Managed Policy: Reference Guide

Copyright © 2026 Amazon Web Services, Inc. and/or its affiliates. All rights reserved.

Amazon's trademarks and trade dress may not be used in connection with any product or service that is not Amazon's, in any manner that is likely to cause confusion among customers, or in any manner that disparages or discredits Amazon. All other trademarks not owned by Amazon are the property of their respective owners, who may or may not be affiliated with, connected to, or sponsored by Amazon.

What are AWS managed policies?

An AWS managed policy is a standalone policy that is created and administered by AWS. AWS managed policies are designed to provide permissions for many common use cases. They make it easier for you to get started with assigning permissions to users, groups, and roles than if you had to write the policies yourself.

Keep in mind that AWS managed policies might not grant least-privilege permissions for your specific use cases because they are available for use by all AWS customers. We recommend that you reduce permissions further by defining customer managed policies that are specific to your use cases.

You cannot change the permissions defined in AWS managed policies. If AWS updates the permissions defined in an AWS managed policy, the update affects all principal identities (users, groups, and roles) that the policy is attached to. AWS is most likely to update an AWS managed policy when a new AWS service is launched or new API operations become available for existing services.

For more information, see AWS managed policies in the IAM User Guide.

Understanding policy reference pages

Each policy reference page includes the following information:

- **Using this policy** – Whether you can attach the policy to users, groups, and roles
- **Policy details**
  - **Type** – The type of AWS managed policy
    - `AWS managed policy` – A standard AWS managed policy
    - `Job function policy` – Policy that aligns with common industry job functions
    - `Service-linked role policy` – Policy that is attached to a service-linked role that allows a service to perform actions on your behalf, such as the section called "AmazonRDSPreviewServiceRolePolicy"
    - `Service role policy` – Policy designed to work with service roles, such as the section called "AWSControlTowerServiceRolePolicy"
  - **Creation time** – When the policy was first created
  - **Edited time** – When this version of the policy was edited

  - **ARN** – The Amazon Resource Name of the policy
- **Policy version** – The version of the permissions granted by the policy
- **JSON policy document** – The policy JSON
- **Learn more** – Links to documentation related to AWS managed policies

Deprecated AWS managed policies

AWS regularly updates AWS managed policies. In most cases, we add permissions to a policy. This happens when we launch a new service or feature. To improve the security of AWS managed policies, we sometimes reduce the scope of policies. When we remove permissions from a policy, we set the policy to a *deprecated* state and make a new one available. When AWS deprecates a service or feature, we also deprecate the AWS managed policy for that feature.

If you receive an email notification that a policy you are using is deprecated, we recommend that you immediately take action. Identify the change to the policy and update your workflows. If AWS provides a replacement policy, plan to attach it to all affected identities (users, groups, and roles) and then detach the deprecated policy from those identities.

A deprecated policy has the following characteristics:

- It is removed from this guide.
- Permissions continue to work for all *currently* attached identities.
- In accounts where the policy is attached to an identity, it appears in the **Policies** list in the IAM console with a warning icon next to it.
- It *cannot* be attached to any new identities. If you detach it from a current identity, you cannot reattach it.
- After you detach it from all current entities, it is no longer visible.

AccessAnalyzerServiceRolePolicy

Description: Allow Access Analyzer to analyze resource metadata

`AccessAnalyzerServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: December 02, 2019, 17:13 UTC
- **Edited time:** February 12, 2026, 17:59 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AccessAnalyzerServiceRolePolicy`

Policy version

Policy version: v23 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AccountAccessManagerServiceRolePolicy

Description: Grants account access manager permissions to manage AWS account access

`AccountAccessManagerServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: June 29, 2026, 19:12 UTC
- **Edited time:** June 29, 2026, 19:12 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AccountAccessManagerServiceRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "organizations:ListAccounts",
        "organizations:ListAWSServiceAccessForOrganization"
      ],
      "Resource" : "*"
    },
    {
      "Effect" : "Allow",
      "Action" : "organizations:DescribeAccount",
      "Resource" : "arn:aws:organizations::*:account/o-*/*",
      "Condition" : {
        "StringEquals" : {
```

```
          "aws:ResourceAccount" : "${aws:PrincipalAccount}"
        }
      }
    }
  ]
}
```

AccountManagementFromVercel

Description: For use with accounts created through the Vercel Marketplace integration with AWS. Provides access to account management, notification, cost and usage analysis, and identity provider management.

`AccountManagementFromVercel` is an AWS managed policy.

Using this policy

You can attach `AccountManagementFromVercel` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: December 11, 2025, 16:34 UTC
- **Edited time:** October 08, 2026, 13:47 UTC
- **ARN**: `arn:aws:iam::aws:policy/AccountManagementFromVercel`

Policy version

Policy version: v5 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```

AdministratorAccess

Description: Provides full access to AWS services and resources.

`AdministratorAccess` is an AWS managed policy.

Using this policy

You can attach `AdministratorAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: February 06, 2015, 18:39 UTC
- **Edited time:** February 06, 2015, 18:39 UTC
- **ARN**: `arn:aws:iam::aws:policy/AdministratorAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```

AdministratorAccess-Amplify

Description: Grants account administrative permissions while explicitly allowing direct access to resources needed by Amplify applications.

`AdministratorAccess-Amplify` is an AWS managed policy.

Using this policy

You can attach `AdministratorAccess-Amplify` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: December 01, 2020, 19:03 UTC

- **Edited time:** April 04, 2024, 20:35 UTC
- **ARN**: `arn:aws:iam::aws:policy/AdministratorAccess-Amplify`

Policy version

Policy version: v12 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AdministratorAccess-AWSElasticBeanstalk

Description: Grants account administrative permissions. Explicitly allows developers and administrators to gain direct access to resources they need to manage AWS Elastic Beanstalk applications

`AdministratorAccess-AWSElasticBeanstalk` is an AWS managed policy.

Using this policy

You can attach `AdministratorAccess-AWSElasticBeanstalk` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: January 22, 2021, 19:36 UTC
- **Edited time:** May 19, 2026, 20:12 UTC
- **ARN**: `arn:aws:iam::aws:policy/AdministratorAccess-AWSElasticBeanstalk`

Policy version

Policy version: v10 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AgentRegistryFullAccess

Description: Provides full access to AWS Agent Registry

`AgentRegistryFullAccess` is an AWS managed policy.

Using this policy

You can attach `AgentRegistryFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: August 06, 2026, 18:12 UTC
- **Edited time:** August 31, 2026, 17:07 UTC
- **ARN**: `arn:aws:iam::aws:policy/AgentRegistryFullAccess`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AIDevOpsAgentActionsPolicy

Description: Provides elevated permissions required by the AWS DevOps Agent to perform operator-approved mutations or elevated actions on customer AWS resources during operational events.

`AIDevOpsAgentActionsPolicy` is an AWS managed policy.

Using this policy

You can attach `AIDevOpsAgentActionsPolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: June 23, 2026, 22:27 UTC
- **Edited time:** August 19, 2026, 22:47 UTC
- **ARN**: `arn:aws:iam::aws:policy/AIDevOpsAgentActionsPolicy`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "AIDevOpsElevatedAccess",
      "Effect" : "Allow",

AIDevOpsAgentFullAccess

Description: Provides full access to Amazon DevOps Agent via the AWS Management Console

`AIDevOpsAgentFullAccess` is an AWS managed policy.

Using this policy

You can attach `AIDevOpsAgentFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: March 26, 2026, 03:42 UTC
- **Edited time:** June 26, 2026, 23:57 UTC
- **ARN**: `arn:aws:iam::aws:policy/AIDevOpsAgentFullAccess`

Policy version

Policy version: v6 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AIDevOpsAgentReadOnlyAccess

Description: Provides read only access to Amazon DevOps Agent via the AWS Management Console

`AIDevOpsAgentReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AIDevOpsAgentReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: March 26, 2026, 03:42 UTC
- **Edited time:** June 11, 2026, 00:57 UTC
- **ARN**: `arn:aws:iam::aws:policy/AIDevOpsAgentReadOnlyAccess`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "AIDevOpsAgentReadOnlyAccess",
      "Effect" : "Allow",
      "Action" : [
        "aidevops:DescribePrivateConnection",

AIOpsConsoleAdminPolicy

Description: Grants full access to Amazon AI Operations service and its required permissions via AWS console. It also includes permissions to use identity-aware console sessions.

`AIOpsConsoleAdminPolicy` is an AWS managed policy.

Using this policy

You can attach `AIOpsConsoleAdminPolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: December 02, 2024, 23:51 UTC
- **Edited time:** February 12, 2026, 17:58 UTC
- **ARN**: `arn:aws:iam::aws:policy/AIOpsConsoleAdminPolicy`

Policy version

Policy version: v9 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AIOpsOperatorAccess

Description: Grants access to the Amazon AI Operations APIs for creating, updating, and deleting investigations, investigation events, and investigation resources. It also includes ReadOnly access to all AI Operations APIs and to use identity-aware sessions.

`AIOpsOperatorAccess` is an AWS managed policy.

Using this policy

You can attach `AIOpsOperatorAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: December 02, 2024, 23:51 UTC
- **Edited time:** February 12, 2026, 17:57 UTC
- **ARN**: `arn:aws:iam::aws:policy/AIOpsOperatorAccess`

Policy version

Policy version: v12 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AIOpsReadOnlyAccess

Description: Grants ReadOnly permissions to the Amazon AI Operations service and its required resources.

`AIOpsReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AIOpsReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: December 02, 2024, 23:51 UTC
- **Edited time:** February 12, 2026, 17:57 UTC
- **ARN**: `arn:aws:iam::aws:policy/AIOpsReadOnlyAccess`

Policy version

Policy version: v6 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "AIOpsReadOnlyAccess",
      "Effect" : "Allow",
      "Action" : [
        "aiops:Get*",
        "aiops:List*",
        "aiops:ValidateInvestigationGroup"
      ],
      "Resource" : "*"
    },
    {

AlexaForBusinessDeviceSetup

Description: Provide device setup access to AlexaForBusiness services

`AlexaForBusinessDeviceSetup` is an AWS managed policy.

Using this policy

You can attach `AlexaForBusinessDeviceSetup` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: November 30, 2017, 16:47 UTC
- **Edited time:** May 20, 2019, 21:05 UTC
- **ARN**: `arn:aws:iam::aws:policy/AlexaForBusinessDeviceSetup`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "a4b:RegisterDevice",
        "a4b:CompleteRegistration",
        "a4b:SearchDevices",
        "a4b:SearchNetworkProfiles",
```

```
        "a4b:GetNetworkProfile",

AlexaForBusinessNetworkProfileServicePolicy

Description: This policy enables Alexa for Business to perform automated tasks scheduled by your network profiles.

`AlexaForBusinessNetworkProfileServicePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy

- **Creation time**: March 13, 2019, 00:53 UTC
- **Edited time:** April 05, 2019, 21:57 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AlexaForBusinessNetworkProfileServicePolicy`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "A4bPcaTagAccess",
      "Action" : [
        "acm-pca:GetCertificate",
        "acm-pca:IssueCertificate",
        "acm-pca:RevokeCertificate"
      ],
      "Effect" : "Allow",
      "Resource" : "*",
      "Condition" : {
        "StringEquals" : {
          "aws:ResourceTag/a4b" : "enabled"
        }
      }
    },
    {
      "Sid" : "A4bNetworkProfileAccess",
      "Effect" : "Allow",
      "Action" : [
        "secretsmanager:GetSecretValue"
      ],

AlexaForBusinessPolyDelegatedAccessPolicy

Description: Provide access to Poly AVS devices

`AlexaForBusinessPolyDelegatedAccessPolicy` is an AWS managed policy.

Using this policy

You can attach `AlexaForBusinessPolyDelegatedAccessPolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: October 16, 2019, 19:48 UTC
- **Edited time:** October 16, 2019, 19:48 UTC
- **ARN**: `arn:aws:iam::aws:policy/AlexaForBusinessPolyDelegatedAccessPolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonAppStreamFullAccess

Description: Provides full access to Amazon AppStream via the AWS Management Console.

`AmazonAppStreamFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonAppStreamFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: February 06, 2015, 18:40 UTC
- **Edited time:** August 28, 2020, 17:24 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonAppStreamFullAccess`

Policy version

Policy version: v6 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{

AmazonAthenaServiceRolePolicy

Description: Allows access to other AWS service resources that are required to run Amazon Athena

`AmazonAthenaServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: November 14, 2025, 22:34 UTC
- **Edited time:** November 14, 2025, 22:34 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonAthenaServiceRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "CloudWatchPolicyStatement",
      "Effect" : "Allow",
      "Action" : [
        "cloudwatch:PutMetricData"
      ],
      "Resource" : "*",
      "Condition" : {
        "StringEquals" : {
          "cloudwatch:namespace" : [
            "AWS/Athena",
            "AWS/Usage"
          ]
        }
      }
    }
  ]
}
```

AmazonAuroraDSQLReadOnlyAccess

Description: Provides read only access to Aurora DSQL

`AmazonAuroraDSQLReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonAuroraDSQLReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: December 03, 2024, 15:21 UTC
- **Edited time:** May 13, 2026, 18:57 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonAuroraDSQLReadOnlyAccess`

Policy version

Policy version: v10 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "DsqlReadOnlyPermissions",
      "Effect" : "Allow",
      "Action" : [
        "dsql:GetClusterPolicy",

AmazonBedrockAgentCoreMemoryBedrockModelInferenceExecution

Description: Provides Bedrock Model inference permission to Bedrock agent core memory

`AmazonBedrockAgentCoreMemoryBedrockModelInferenceExecutionRolePolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonBedrockAgentCoreMemoryBedrockModelInferenceExecutionRolePolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: July 16, 2025, 13:37 UTC
- **Edited time:** July 17, 2026, 17:12 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonBedrockAgentCoreMemoryBedrockModelInferenceExecutionRolePolicy`

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonBedrockLimitedAccess

Description: Provides limited access to Amazon Bedrock as well as to related services that are required by it

`AmazonBedrockLimitedAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonBedrockLimitedAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: June 29, 2025, 22:22 UTC
- **Edited time:** August 04, 2026, 05:27 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonBedrockLimitedAccess`

Policy version

Policy version: v9 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```

AmazonBedrockReadOnly

Description: Provides read only access to Amazon Bedrock

`AmazonBedrockReadOnly` is an AWS managed policy.

Using this policy

You can attach `AmazonBedrockReadOnly` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: December 06, 2023, 15:48 UTC
- **Edited time:** February 12, 2026, 17:57 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonBedrockReadOnly`

Policy version

Policy version: v7 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonBraketFullAccess

Description: Provides full access to Amazon Braket via the AWS Management Console and SDK. Also provides access to related services (e.g., S3, logs).

`AmazonBraketFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonBraketFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: August 06, 2020, 20:12 UTC

- **Edited time:** July 06, 2026, 19:57 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonBraketFullAccess`

Policy version

Policy version: v13 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{

AmazonBraketServiceRolePolicy

Description: Allows Amazon Braket to create and manage AWS resources on your behalf

`AmazonBraketServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: August 04, 2020, 17:12 UTC
- **Edited time:** July 06, 2026, 18:42 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonBraketServiceRolePolicy`

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "s3:PutObject",
        "s3:GetObject",
        "s3:ListBucket"
      ],
      "Resource" : "arn:aws:s3:::amazon-braket-*",
      "Condition" : {
        "StringEquals" : {
          "aws:ResourceAccount" : "${aws:PrincipalAccount}"
        }
```

```
      }
    },
    {
      "Effect" : "Allow",
      "Action" : [
        "s3:PutObject",
        "s3:GetObject",
        "s3:ListBucket"
      ],
      "Resource" : "arn:aws:s3:::*",
      "Condition" : {
        "StringEquals" : {
          "aws:ResourceAccount" : "${aws:PrincipalAccount}"
        },
        "StringEqualsIgnoreCase" : {
          "aws:ResourceTag/AmazonBraket" : "true"
        }
      }
    },
    {
      "Effect" : "Allow",
      "Action" : [
        "logs:PutLogEvents",
        "logs:CreateLogStream",
        "logs:DescribeLogStreams",
        "logs:CreateLogGroup",
        "logs:DescribeLogGroups"
      ],
      "Resource" : "arn:aws:logs:*:*:log-group:/aws/braket:*",
      "Condition" : {
        "StringEquals" : {
          "aws:ResourceAccount" : "${aws:PrincipalAccount}"
        }
      }
    }
  ]
}

AmazonChimeReadOnly

Description: Provides read only access to Amazon Chime Admin Console via the AWS Management Console.

`AmazonChimeReadOnly` is an AWS managed policy.

Using this policy

You can attach `AmazonChimeReadOnly` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: November 01, 2017, 22:04 UTC
- **Edited time:** December 14, 2020, 20:53 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonChimeReadOnly`

Policy version

Policy version: v10 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Action" : [
        "chime:List*",
        "chime:Get*",
        "chime:Describe*",
        "chime:SearchAvailablePhoneNumbers"
      ],
      "Effect" : "Allow",
```

```
      "Resource" : "*"
    }
  ]
}
```

AmazonChimeSDK

Description: Provides access to Amazon Chime SDK operations

`AmazonChimeSDK` is an AWS managed policy.

Using this policy

You can attach `AmazonChimeSDK` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: February 04, 2020, 21:53 UTC
- **Edited time:** January 10, 2023, 18:05 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonChimeSDK`

Policy version

Policy version: v5 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonChimeSDKMediaPipelinesServiceLinkedRolePolicy

Description: Managed Policy For Amazon Chime SDK MediaPipelines Service Linked Role

`AmazonChimeSDKMediaPipelinesServiceLinkedRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: April 04, 2022, 22:02 UTC
- **Edited time:** December 08, 2023, 19:14 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonChimeSDKMediaPipelinesServiceLinkedRolePolicy`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
```

```
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "AllowPutMetricsForChimeSDKNamespace",
      "Effect" : "Allow",

AmazonCloudWatchRUMServiceRolePolicy

Description: Grants permission to Amazon CloudWatch RUM Service to publish monitoring data to other relevant AWS services

`AmazonCloudWatchRUMServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: November 17, 2021, 23:17 UTC
- **Edited time:** February 22, 2023, 20:35 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonCloudWatchRUMServiceRolePolicy`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "xray:PutTraceSegments"
      ],
      "Resource" : [
        "*"
      ]
    },
    {
      "Effect" : "Allow",
      "Action" : "cloudwatch:PutMetricData",
      "Resource" : "*",
      "Condition" : {
        "StringLike" : {
          "cloudwatch:namespace" : [
            "RUM/CustomMetrics/*",
            "AWS/RUM"
          ]
        }
      }
    }
  ]
}

AmazonCognitoUnAuthedIdentitiesSessionPolicy

Description: This policy defines the set of permissions allowed for unauthenticated identities for Cognito Identity Pools. This policy is not intended to be used as a stand alone permission policy.

It is used as a guardrail against overly permissive policies attached for roles in an identity pool. Do not attach this policy to any roles, as Cognito Identity Service will automatically include it as a scoped down policy when creating credentials. The privileges to temporarily access other AWS resources through the enhanced flow will now be defined by the intersection of the role associated with the identity of the unauthenticated user provided by a service, and the privileges given in this managed policy that is owned by Cognito.

`AmazonCognitoUnAuthedIdentitiesSessionPolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonCognitoUnAuthedIdentitiesSessionPolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: July 19, 2023, 23:04 UTC
- **Edited time:** May 01, 2026, 19:57 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonCognitoUnAuthedIdentitiesSessionPolicy`

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{

AmazonConnectCampaignsServiceLinkedRolePolicy

Description: Policy for Amazon Connect Campaigns service linked role

`AmazonConnectCampaignsServiceLinkedRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: September 23, 2021, 20:54 UTC
- **Edited time:** June 18, 2026, 23:12 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonConnectCampaignsServiceLinkedRolePolicy`

Policy version

Policy version: v5 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

AmazonConnectReadOnlyAccess

Description: Grants permission to view the Amazon Connect instances in your AWS account.

`AmazonConnectReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonConnectReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: October 17, 2018, 21:00 UTC
- **Edited time:** June 19, 2024, 15:15 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonConnectReadOnlyAccess`

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "AllowConnectReadOnly",
      "Effect" : "Allow",
```

```
      "Action" : [
        "connect:Get*",
        "connect:Describe*",
        "connect:List*",
        "ds:DescribeDirectories"
      ],
      "Resource" : "*"
    },
    {
      "Sid" : "DenyConnectEmergencyAccess",
      "Effect" : "Deny",
      "Action" : "connect:AdminGetEmergencyAccessToken",
      "Resource" : "*"
    }
  ]
}
```

AmazonConnectSynchronizationServiceRolePolicy

Description: Allows Amazon Connect to synchronize AWS resources across regions on your behalf.

`AmazonConnectSynchronizationServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: October 27, 2023, 22:38 UTC
- **Edited time:** October 28, 2026, 19:17 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonConnectSynchronizationServiceRolePolicy`

Policy version

Policy version: v7 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonConnectVoiceIDFullAccess

Description: Provides full access to Amazon Connect Voice ID

`AmazonConnectVoiceIDFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonConnectVoiceIDFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 26, 2021, 19:04 UTC
- **Edited time:** September 26, 2021, 19:04 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonConnectVoiceIDFullAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : "voiceid:*",
      "Resource" : "*"
    }
  ]
}
```

AmazonDataZoneBedrockModelConsumptionPolicy

Description: Provides permissions to consume Amazon Bedrock models, including invoking Amazon Bedrock application inference profile created for particular Amazon DataZone domain.

`AmazonDataZoneBedrockModelConsumptionPolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonDataZoneBedrockModelConsumptionPolicy` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: November 12, 2024, 22:15 UTC
- **Edited time:** February 12, 2026, 18:01 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonDataZoneBedrockModelConsumptionPolicy`

Policy version

Policy version: v7 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [

AmazonDataZoneDomainExecutionRolePolicy

Description: Default policy for the Amazon DataZone's DomainExecutionRole service role. This role is used by Amazon DataZone to catalog, discover, govern, share, and analyze data in the Amazon DataZone domain.

`AmazonDataZoneDomainExecutionRolePolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonDataZoneDomainExecutionRolePolicy` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: September 27, 2023, 21:55 UTC
- **Edited time:** February 26, 2026, 00:12 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonDataZoneDomainExecutionRolePolicy`

Policy version

Policy version: v13 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonDataZoneEnvironmentRolePermissionsBoundary

Description: Amazon DataZone creates IAM roles for Environments to perform data analytics actions, and uses this policy when creating these roles to define the boundary of their permissions.

`AmazonDataZoneEnvironmentRolePermissionsBoundary` is an AWS managed policy.

Using this policy

You can attach `AmazonDataZoneEnvironmentRolePermissionsBoundary` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 11, 2023, 23:38 UTC
- **Edited time:** November 17, 2023, 23:29 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonDataZoneEnvironmentRolePermissionsBoundary`

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```

AmazonDataZoneFullAccess

Description: Provides full access to Amazon DataZone via the AWS Management Console as well as limited access to related services that are required by it.

`AmazonDataZoneFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonDataZoneFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 22, 2023, 20:06 UTC
- **Edited time:** February 12, 2026, 17:59 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonDataZoneFullAccess`

Policy version

Policy version: v13 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonDataZoneFullUserAccess

Description: Provides full access to Amazon DataZone, but does not allow the management of domains, users, or associated accounts.

`AmazonDataZoneFullUserAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonDataZoneFullUserAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 22, 2023, 21:06 UTC
- **Edited time:** November 19, 2024, 21:38 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonDataZoneFullUserAccess`

Policy version

Policy version: v9 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonDataZoneGlueManageAccessRolePolicy

Description: The policy grants permissions to allow Amazon DataZone to enable publishing and access grants to data.

`AmazonDataZoneGlueManageAccessRolePolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonDataZoneGlueManageAccessRolePolicy` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: September 22, 2023, 20:21 UTC
- **Edited time:** February 12, 2026, 18:00 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonDataZoneGlueManageAccessRolePolicy`

Policy version

Policy version: v18 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonDataZonePortalFullAccessPolicy

Description: Provides full access to Amazon DataZone APIs

`AmazonDataZonePortalFullAccessPolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonDataZonePortalFullAccessPolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: March 26, 2023, 18:24 UTC
- **Edited time:** March 26, 2023, 18:24 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonDataZonePortalFullAccessPolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : "datazonecontrol:*",
      "Resource" : "*"
    }
  ]
}
```

AmazonDataZoneProjectDeploymentPermissionsBoundary

Description: Amazon DataZone creates IAM roles that it uses for deploying data analytics projects. DataZone uses this policy when creating these roles to define the boundary of their permissions.

`AmazonDataZoneProjectDeploymentPermissionsBoundary` is an AWS managed policy.

Using this policy

You can attach `AmazonDataZoneProjectDeploymentPermissionsBoundary` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: March 21, 2023, 02:54 UTC
- **Edited time:** April 04, 2023, 02:48 UTC

AmazonDataZoneProjectRolePermissionsBoundary

Description: Amazon DataZone creates IAM roles for projects to perform data analytics actions, and uses this policy when creating these roles to define the boundary of their permissions.

`AmazonDataZoneProjectRolePermissionsBoundary` is an AWS managed policy.

Using this policy

You can attach `AmazonDataZoneProjectRolePermissionsBoundary` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: March 21, 2023, 02:51 UTC
- **Edited time:** March 21, 2023, 02:51 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonDataZoneProjectRolePermissionsBoundary`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonDataZoneRedshiftGlueProvisioningPolicy

Description: Amazon DataZone is a data management service that enables you to catalog, discover, govern, share, and analyze your data. With Amazon DataZone, you can share and access your data across accounts and supported regions. Amazon DataZone simplifies your experience across AWS services, including, but not limited to, Amazon Redshift, Amazon Athena, AWS Glue, and AWS Lake Formation.

`AmazonDataZoneRedshiftGlueProvisioningPolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonDataZoneRedshiftGlueProvisioningPolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 22, 2023, 20:19 UTC
- **Edited time:** August 21, 2026, 22:27 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonDataZoneRedshiftGlueProvisioningPolicy`

Policy version

Policy version: v5 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonDataZoneRedshiftManageAccessRolePolicy

Description: This policy gives Amazon DataZone permissions to publish Amazon Redshift data to the catalog. It also gives Amazon DataZone permissions to grant access or revoke access to Amazon Redshift or Amazon Redshift Serverless published assets in the catalog.

`AmazonDataZoneRedshiftManageAccessRolePolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonDataZoneRedshiftManageAccessRolePolicy` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: September 22, 2023, 20:15 UTC
- **Edited time:** February 12, 2026, 18:01 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonDataZoneRedshiftManageAccessRolePolicy`

Policy version

Policy version: v5 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonDataZoneSageMakerEnvironmentRolePermissionsBoundary

Description: The AmazonDataZoneSageMakerEnvironmentRolePermissionsBoundary policy is the list of permissions that are permitted on an execution role created in a SageMaker environment provisioned by Amazon DataZone.

`AmazonDataZoneSageMakerEnvironmentRolePermissionsBoundary` is an AWS managed policy.

Using this policy

You can attach `AmazonDataZoneSageMakerEnvironmentRolePermissionsBoundary` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: April 23, 2024, 23:01 UTC
- **Edited time:** July 17, 2026, 17:42 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonDataZoneSageMakerEnvironmentRolePermissionsBoundary`

Policy version

Policy version: v13 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonDataZoneSageMakerManageAccessRolePolicy

Description: The AmazonDataZoneSageMakerManageAccessRolePolicy policy grants Amazon DataZone the permissions required to grant user access to various resources in the SageMaker environment.

`AmazonDataZoneSageMakerManageAccessRolePolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonDataZoneSageMakerManageAccessRolePolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: April 23, 2024, 23:34 UTC
- **Edited time:** February 12, 2026, 18:03 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonDataZoneSageMakerManageAccessRolePolicy`

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonDetectiveServiceLinkedRolePolicy

Description: Allows Amazon Detective to make service calls on your behalf

`AmazonDetectiveServiceLinkedRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: November 18, 2021, 19:47 UTC
- **Edited time:** November 18, 2021, 19:47 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonDetectiveServiceLinkedRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "organizations:DescribeAccount",
        "organizations:ListAccounts"
      ],
      "Resource" : "*"
    }
  ]
}

AmazonDevOpsGuruServiceRolePolicy

Description: A service-linked role required for Amazon DevOpsGuru to access your resources.

`AmazonDevOpsGuruServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: December 01, 2020, 10:24 UTC
- **Edited time:** January 10, 2023, 14:36 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonDevOpsGuruServiceRolePolicy`

Policy version

Policy version: v9 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

AmazonDMSRedshiftS3Role

Description: Provides access to manage S3 settings for Redshift endpoints for DMS.

`AmazonDMSRedshiftS3Role` is an AWS managed policy.

Using this policy

You can attach `AmazonDMSRedshiftS3Role` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: April 20, 2016, 17:05 UTC
- **Edited time:** July 08, 2019, 18:19 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonDMSRedshiftS3Role`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "s3:CreateBucket",

AmazonDocDBElasticFullAccess

Description: Provides full access to Amazon DocumentDB Elastic Clusters and other required permissions for its dependencies including EC2, KMS, SecretsManager, CloudWatch and IAM.

`AmazonDocDBElasticFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonDocDBElasticFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: June 05, 2023, 13:51 UTC
- **Edited time:** February 12, 2026, 17:58 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonDocDBElasticFullAccess`

Policy version

Policy version: v8 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonDocDBElasticReadOnlyAccess

Description: Provides read-only access to Amazon DocDB-Elastic and CloudWatch metrics.

`AmazonDocDBElasticReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonDocDBElasticReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: June 08, 2023, 14:37 UTC
- **Edited time:** June 21, 2023, 16:57 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonDocDBElasticReadOnlyAccess`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonDRSVPCManagement

Description: Provides access to manage VPC settings for Amazon managed customer configurations

`AmazonDRSVPCManagement` is an AWS managed policy.

Using this policy

You can attach `AmazonDRSVPCManagement` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 02, 2015, 00:09 UTC
- **Edited time:** September 02, 2015, 00:09 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonDRSVPCManagement`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
```

```
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "ec2:AuthorizeSecurityGroupIngress",
        "ec2:CreateNetworkInterface",
        "ec2:CreateSecurityGroup",
        "ec2:DescribeAvailabilityZones",

AmazonDynamoDBFullAccess

Description: Provides full access to Amazon DynamoDB via the AWS Management Console.

`AmazonDynamoDBFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonDynamoDBFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: February 06, 2015, 18:40 UTC
- **Edited time:** January 29, 2021, 17:38 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonDynamoDBFullAccess`

Policy version

Policy version: v15 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```

AmazonDynamoDBFullAccess_v2

Description: Provides full access to Amazon DynamoDB

`AmazonDynamoDBFullAccess_v2` is an AWS managed policy.

Using this policy

You can attach `AmazonDynamoDBFullAccess_v2` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: May 22, 2025, 14:52 UTC
- **Edited time:** February 12, 2026, 18:02 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonDynamoDBFullAccess_v2`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonDynamoDBFullAccesswithDataPipeline

Description: This policy is on a deprecation path. See documentation for guidance: https://docs.aws.amazon.com/amazondynamodb/latest/developerguide/DynamoDBPipeline.html. Provides full access to Amazon DynamoDB including Export/Import using AWS Data Pipeline via the AWS Management Console.

`AmazonDynamoDBFullAccesswithDataPipeline` is an AWS managed policy.

Using this policy

You can attach `AmazonDynamoDBFullAccesswithDataPipeline` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: February 06, 2015, 18:40 UTC
- **Edited time:** November 12, 2015, 02:17 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonDynamoDBFullAccesswithDataPipeline`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonEBSCSIDriverEKSClusterScopedPolicy

Description: IAM Policy that allows the CSI driver service account to make calls to related services such as EC2 on your behalf. This policy restricts the Amazon EBS CSI driver to only managing EBS volumes and snapshots that belong to a specific EKS cluster. It requires the resource tag ebs.csi.aws.com/cluster-name to match the eks-cluster-name tag on the IAM principal, preventing

cross-cluster access when multiple clusters share the same AWS account. Attach and detach operations on instances are restricted to instances tagged with either the eks:cluster-name tag (set automatically by EKS on managed node groups) or the ebs.csi.aws.com/cluster-name tag (for manually tagged instances).

`AmazonEBSCSIDriverEKSClusterScopedPolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonEBSCSIDriverEKSClusterScopedPolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: April 16, 2026, 17:27 UTC
- **Edited time:** May 28, 2026, 17:27 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonEBSCSIDriverEKSClusterScopedPolicy`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonEBSCSIDriverPolicy

Description: IAM Policy that allows the CSI driver service account to make calls to related services such as EC2 on your behalf.

`AmazonEBSCSIDriverPolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonEBSCSIDriverPolicy` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: April 04, 2022, 17:24 UTC
- **Edited time:** May 13, 2026, 17:42 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonEBSCSIDriverPolicy`

Policy version

Policy version: v15 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

AmazonEBSCSIDriverPolicyV2

Description: IAM Policy that allows the EBS CSI driver service account to make calls to related services such as EC2 on your behalf. It limits the Amazon EBS CSI driver to only managing EBS volumes and snapshots that are tagged with the key ebs.csi.aws.com/cluster set to true. Volumes provisioned by the in-tree Kubernetes volume plugin (CSI-migrated volumes) are also supported through the kubernetes.io/created-for/pvc/name resource tag.

`AmazonEBSCSIDriverPolicyV2` is an AWS managed policy.

Using this policy

You can attach `AmazonEBSCSIDriverPolicyV2` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: April 16, 2026, 17:27 UTC
- **Edited time:** April 16, 2026, 17:27 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonEBSCSIDriverPolicyV2`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonEC2ContainerRegistryFullAccess

Description: Provides administrative access to Amazon ECR resources

`AmazonEC2ContainerRegistryFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonEC2ContainerRegistryFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: December 21, 2015, 17:06 UTC
- **Edited time:** December 05, 2020, 00:04 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonEC2ContainerRegistryFullAccess`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "ecr:*",
        "cloudtrail:LookupEvents"
      ],
      "Resource" : "*"
    },
    {
      "Effect" : "Allow",
      "Action" : [
        "iam:CreateServiceLinkedRole"
      ],
      "Resource" : "*",
      "Condition" : {
        "StringEquals" : {
```

```
          "iam:AWSServiceName" : [
            "replication.ecr.amazonaws.com"
          ]
        }
      }
    }
  ]
}
```

AmazonEC2ContainerRegistryPowerUser

Description: Provides full access to Amazon EC2 Container Registry repositories, but does not allow repository deletion or policy changes.

`AmazonEC2ContainerRegistryPowerUser` is an AWS managed policy.

Using this policy

You can attach `AmazonEC2ContainerRegistryPowerUser` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: December 21, 2015, 17:05 UTC
- **Edited time:** December 10, 2019, 20:48 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonEC2ContainerRegistryPowerUser`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "ecr:GetAuthorizationToken",
        "ecr:BatchCheckLayerAvailability",
        "ecr:GetDownloadUrlForLayer",
        "ecr:GetRepositoryPolicy",
        "ecr:DescribeRepositories",
        "ecr:ListImages",
        "ecr:DescribeImages",
        "ecr:BatchGetImage",
        "ecr:GetLifecyclePolicy",
        "ecr:GetLifecyclePolicyPreview",
        "ecr:ListTagsForResource",
        "ecr:DescribeImageScanFindings",
        "ecr:InitiateLayerUpload",
        "ecr:UploadLayerPart",
        "ecr:CompleteLayerUpload",
        "ecr:PutImage"
      ],
      "Resource" : "*"
    }
  ]

AmazonEC2ContainerRegistryPullOnly

Description: Provides access to pull images from Amazon EC2 Container Registry repositories.

`AmazonEC2ContainerRegistryPullOnly` is an AWS managed policy.

Using this policy

You can attach `AmazonEC2ContainerRegistryPullOnly` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: October 04, 2024, 16:58 UTC
- **Edited time:** October 04, 2024, 16:58 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonEC2ContainerRegistryPullOnly`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "ecr:GetAuthorizationToken",
        "ecr:BatchGetImage",
        "ecr:GetDownloadUrlForLayer",
        "ecr:BatchImportUpstreamImage"
      ],
```

```
      "Resource" : "*"
    }
  ]
}
```

AmazonEC2RoleforAWSCodeDeployLimited

Description: Provides EC2 limited access to S3 bucket to download revision. This role is needed by the CodeDeploy agent on EC2 instances.

`AmazonEC2RoleforAWSCodeDeployLimited` is an AWS managed policy.

Using this policy

You can attach `AmazonEC2RoleforAWSCodeDeployLimited` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: August 24, 2020, 17:55 UTC
- **Edited time:** January 20, 2022, 21:37 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonEC2RoleforAWSCodeDeployLimited`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "s3:GetObject",
        "s3:GetObjectVersion",
        "s3:ListBucket"
      ],
      "Resource" : "arn:aws:s3:::*/CodeDeploy/*"
    },
    {
      "Effect" : "Allow",
      "Action" : [
        "s3:GetObject",
        "s3:GetObjectVersion"
      ],
      "Resource" : "*",
      "Condition" : {
        "StringEquals" : {
          "s3:ExistingObjectTag/UseWithCodeDeploy" : "true"
        }
      }
    }
  ]
}

AmazonEC2RoleforDataPipelineRole

Description: Default policy for the Amazon EC2 Role for Data Pipeline service role.

`AmazonEC2RoleforDataPipelineRole` is an AWS managed policy.

Using this policy

You can attach `AmazonEC2RoleforDataPipelineRole` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: February 06, 2015, 18:41 UTC
- **Edited time:** February 22, 2016, 17:24 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonEC2RoleforDataPipelineRole`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonEC2RoleforSSM

Description: This policy will soon be deprecated. Please use AmazonSSMManagedInstanceCore policy to enable AWS Systems Manager service core functionality on EC2 instances. For more information see https://docs.aws.amazon.com/systems-manager/latest/userguide/setup-instance-profile.html

`AmazonEC2RoleforSSM` is an AWS managed policy.

Using this policy

You can attach `AmazonEC2RoleforSSM` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: May 29, 2015, 17:48 UTC
- **Edited time:** January 24, 2019, 19:20 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonEC2RoleforSSM`

Policy version

Policy version: v8 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```

AmazonECSComputeServiceRolePolicy

Description: Policy to enable Amazon ECS Compute to manage your EC2 instances and related resources as part of ECS managed instances

`AmazonECSComputeServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: March 24, 2025, 17:37 UTC
- **Edited time:** February 12, 2026, 17:57 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonECSComputeServiceRolePolicy`

Policy version

Policy version: v6 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [

AmazonECSInfrastructureRoleforExpressGatewayServices

Description: These permissions enable Amazon ECS to automatically provision and manage the infrastructure components required for Express Gateway Services, including load balancing, security groups, SSL certificates, and auto scaling configurations.

`AmazonECSInfrastructureRoleforExpressGatewayServices` is an AWS managed policy.

Using this policy

You can attach `AmazonECSInfrastructureRoleforExpressGatewayServices` to your users, groups, and roles.

Policy details

- **Type**: Service role policy

- **Creation time**: November 12, 2025, 20:34 UTC
- **Edited time:** February 12, 2026, 18:01 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonECSInfrastructureRoleforExpressGatewayServices`

Policy version

Policy version: v6 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonECSInfrastructureRoleForGatewayHostSharedALB

Description: Default policy for the Amazon ECS Infrastructure Role for Amazon ECS Service Gateway Services.

AmazonECSInfrastructureRoleForGatewayHostSharedALB is an AWS managed policy.

Using this policy

You can attach AmazonECSInfrastructureRoleForGatewayHostSharedALB to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 25, 2026, 21:17 UTC
- **Edited time:** September 25, 2026, 21:17 UTC
- **ARN**: arn:aws:iam::aws:policy/AmazonECSInfrastructureRoleForGatewayHostSharedALB

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonECSInfrastructureRolePolicyForLoadBalancers

Description: Provides access to other AWS service resources required to manage load balancers associated with ECS workloads on your behalf.

`AmazonECSInfrastructureRolePolicyForLoadBalancers` is an AWS managed policy.

Using this policy

You can attach `AmazonECSInfrastructureRolePolicyForLoadBalancers` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: July 17, 2025, 16:37 UTC
- **Edited time:** February 12, 2026, 18:01 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonECSInfrastructureRolePolicyForLoadBalancers`

Policy version

Policy version: v6 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

AmazonECSInfrastructureRolePolicyForServiceConnectTransportLay

Description: Provides administrative access to Private Certificate Authority, AWS Secrets Manager and other AWS services required to manage ECS Service Connect TLS features on your behalf.

`AmazonECSInfrastructureRolePolicyForServiceConnectTransportLayerSecurity` is an AWS managed policy.

Using this policy

You can attach `AmazonECSInfrastructureRolePolicyForServiceConnectTransportLayerSecurity` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: January 19, 2024, 20:08 UTC
- **Edited time:** February 12, 2026, 18:02 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonECSInfrastructureRolePolicyForServiceConnectTransportLayerSecurity`

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonECSTaskExecutionRolePolicy

Description: Provides access to other AWS service resources that are required to run Amazon ECS tasks

`AmazonECSTaskExecutionRolePolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonECSTaskExecutionRolePolicy` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: November 16, 2017, 18:48 UTC
- **Edited time:** November 16, 2017, 18:48 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonECSTaskExecutionRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonEKS_CNI_Policy

Description: This policy provides the Amazon VPC CNI Plugin (amazon-vpc-cni-k8s) the permissions it requires to modify the IP address configuration on your EKS worker nodes. This permission set allows the CNI to list, describe, and modify Elastic Network Interfaces on your behalf. More information on the AWS VPC CNI Plugin is available here: https://github.com/aws/amazon-vpc-cni-k8s

`AmazonEKS_CNI_Policy` is an AWS managed policy.

Using this policy

You can attach `AmazonEKS_CNI_Policy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: May 27, 2018, 21:07 UTC
- **Edited time:** March 04, 2026, 19:12 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonEKS_CNI_Policy`

Policy version

Policy version: v6 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```

AmazonEKSClusterPolicy

Description: This policy provides Kubernetes the permissions it requires to manage resources on your behalf. Kubernetes requires Ec2:CreateTags permissions to place identifying information on EC2 resources including but not limited to Instances, Security Groups, and Elastic Network Interfaces.

`AmazonEKSClusterPolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonEKSClusterPolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: May 27, 2018, 21:06 UTC
- **Edited time:** February 12, 2026, 17:58 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonEKSClusterPolicy`

Policy version

Policy version: v10 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonEKSComputePolicy

Description: Policy attached to the EKS Cluster Role that grants permissions to manage the cluster's compute resources.

`AmazonEKSComputePolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonEKSComputePolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: November 01, 2024, 21:46 UTC
- **Edited time:** May 18, 2026, 21:12 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonEKSComputePolicy`

Policy version

Policy version: v7 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonEKSConnectorServiceRolePolicy

Description: This policy allows Amazon EKS to manage AWS resources for EKS connector

`AmazonEKSConnectorServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: September 04, 2021, 20:31 UTC
- **Edited time:** October 15, 2025, 22:34 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonEKSConnectorServiceRolePolicy`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

AmazonEKSDashboardConsoleReadOnly

Description: Provides read only access to view the dashboard in the Amazon EKS console. The dashboard aggregates information about multiple clusters and related resources using AWS Organizations.

`AmazonEKSDashboardConsoleReadOnly` is an AWS managed policy.

Using this policy

You can attach `AmazonEKSDashboardConsoleReadOnly` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: June 19, 2025, 17:22 UTC
- **Edited time:** February 12, 2026, 17:59 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonEKSDashboardConsoleReadOnly`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonEKSLocalOutpostClusterPolicy

Description: This policy provides permissions to EKS local cluster's control-plane instances running in your account to manage resources on your behalf.

`AmazonEKSLocalOutpostClusterPolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonEKSLocalOutpostClusterPolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: August 24, 2022, 21:56 UTC
- **Edited time:** October 24, 2024, 17:59 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonEKSLocalOutpostClusterPolicy`

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonEKSLocalOutpostServiceRolePolicy

Description: Allows Amazon EKS Local to call AWS services on your behalf.

`AmazonEKSLocalOutpostServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: August 23, 2022, 21:53 UTC
- **Edited time:** June 26, 2025, 18:22 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonEKSLocalOutpostServiceRolePolicy`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonEKSMCPReadOnlyAccess

Description: Provides read-only access to the Amazon EKS MCP service. This policy grants permissions to use only read-only tools in the EKS MCP service meant for observability, troubleshooting, retrieving EKS resource information, and getting EKS-optimized suggestions.

`AmazonEKSMCPReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonEKSMCPReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: November 20, 2025, 17:19 UTC
- **Edited time:** February 12, 2026, 18:02 UTC

- **ARN**: `arn:aws:iam::aws:policy/AmazonEKSMCPReadOnlyAccess`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonEKSNetworkingPolicy

Description: Policy attached to the EKS Cluster Role that grants permissions to manage the cluster's networking resources.

`AmazonEKSNetworkingPolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonEKSNetworkingPolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: October 28, 2024, 22:34 UTC
- **Edited time:** August 21, 2026, 17:27 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonEKSNetworkingPolicy`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
```

```
  "Statement" : [

AmazonEKSServicePolicy

Description: This policy allows Amazon Elastic Container Service for Kubernetes to create and manage the necessary resources to operate EKS Clusters.

`AmazonEKSServicePolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonEKSServicePolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: May 27, 2018, 21:08 UTC
- **Edited time:** October 14, 2024, 21:12 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonEKSServicePolicy`

Policy version

Policy version: v7 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonEKSServiceRolePolicy

Description: A Service-Linked Role required for Amazon EKS to call AWS services on your behalf.

`AmazonEKSServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: February 21, 2020, 20:10 UTC
- **Edited time:** October 22, 2026, 16:37 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonEKSServiceRolePolicy`

Policy version

Policy version: v29 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonEKSVPCResourceController

Description: Policy used by VPC Resource Controller to manage ENI and IPs for worker nodes.

`AmazonEKSVPCResourceController` is an AWS managed policy.

Using this policy

You can attach `AmazonEKSVPCResourceController` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: August 12, 2020, 00:55 UTC
- **Edited time:** August 12, 2020, 00:55 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonEKSVPCResourceController`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
```

```
      "Action" : "ec2:CreateNetworkInterfacePermission",
      "Resource" : "*",
      "Condition" : {
        "ForAnyValue:StringEquals" : {
          "ec2:ResourceTag/eks:eni:owner" : "eks-vpc-resource-controller"
        }
      }
    },
    {
      "Effect" : "Allow",
      "Action" : [
        "ec2:CreateNetworkInterface",
        "ec2:DetachNetworkInterface",
        "ec2:ModifyNetworkInterfaceAttribute",
        "ec2:DeleteNetworkInterface",
        "ec2:AttachNetworkInterface",

AmazonElasticFileSystemReadOnlyAccess

Description: Provides read only access to Amazon EFS via the AWS Management Console.

`AmazonElasticFileSystemReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonElasticFileSystemReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: May 27, 2015, 16:25 UTC
- **Edited time:** November 07, 2024, 19:39 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonElasticFileSystemReadOnlyAccess`

Policy version

Policy version: v9 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "ElasticFileSystemReadOnlyAccess",
      "Effect" : "Allow",
      "Action" : [
```

```

AmazonElasticFileSystemServiceRolePolicy

Description: Allows Amazon Elastic File System to manage AWS resources on your behalf

`AmazonElasticFileSystemServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: November 05, 2019, 16:52 UTC
- **Edited time:** November 07, 2024, 19:19 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonElasticFileSystemServiceRolePolicy`

Policy version

Policy version: v5 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonElasticFileSystemsUtils

Description: Allows customers to use AWS Systems Manager to automatically manage Amazon EFS utilities (amazon-efs-utils) package on their EC2 instances, and use CloudWatchLog to get EFS file system mount success/failure notifications.

`AmazonElasticFileSystemsUtils` is an AWS managed policy.

Using this policy

You can attach `AmazonElasticFileSystemsUtils` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 29, 2020, 15:16 UTC
- **Edited time:** April 07, 2026, 13:12 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonElasticFileSystemsUtils`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonElasticMapReducePlacementGroupPolicy

Description: Policy to allow EMR to create, describe and delete EC2 placement groups.

`AmazonElasticMapReducePlacementGroupPolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonElasticMapReducePlacementGroupPolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 29, 2020, 00:37 UTC
- **Edited time:** September 29, 2020, 00:37 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonElasticMapReducePlacementGroupPolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
```

```
  "Statement" : [
    {
      "Resource" : "*",
      "Effect" : "Allow",
      "Action" : [
        "ec2:DeletePlacementGroup",
        "ec2:DescribePlacementGroups"
      ]
    },
    {
      "Resource" : "arn:aws:ec2:*:*:placement-group/EMR_*",
      "Effect" : "Allow",
      "Action" : [
        "ec2:CreatePlacementGroup"
      ]
    }
  ]
}
```

AmazonElasticMapReduceReadOnlyAccess

Description: Provides read only access to Amazon Elastic MapReduce via the AWS Management Console.

`AmazonElasticMapReduceReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonElasticMapReduceReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy

- **Creation time**: February 06, 2015, 18:40 UTC
- **Edited time:** July 29, 2020, 23:14 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonElasticMapReduceReadOnlyAccess`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Action" : [
        "elasticmapreduce:Describe*",
        "elasticmapreduce:List*",
        "elasticmapreduce:GetBlockPublicAccessConfiguration",
        "elasticmapreduce:ViewEventsFromAllClustersInConsole",
        "s3:GetObject",
        "s3:ListAllMyBuckets",
        "s3:ListBucket",
        "sdb:Select",
        "cloudwatch:GetMetricStatistics"
      ],
      "Effect" : "Allow",
      "Resource" : "*"
    }
  ]
}
```

AmazonElasticMapReduceRole

Description: This policy is on a deprecation path. See documentation for guidance: https://docs.aws.amazon.com/emr/latest/ManagementGuide/emr-managed-iam-policies.html. Default policy for the Amazon Elastic MapReduce service role.

`AmazonElasticMapReduceRole` is an AWS managed policy.

Using this policy

You can attach `AmazonElasticMapReduceRole` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: February 06, 2015, 18:41 UTC
- **Edited time:** June 24, 2020, 22:24 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonElasticMapReduceRole`

Policy version

Policy version: v10 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonEMRContainersServiceRolePolicy

Description: Allows access to other AWS service resources that are required to run Amazon EMR

`AmazonEMRContainersServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: December 09, 2020, 00:38 UTC
- **Edited time:** July 24, 2026, 17:27 UTC

- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonEMRContainersServiceRolePolicy`

Policy version

Policy version: v6 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonEMRFullAccessPolicy_v2

Description: Provides full access to Amazon EMR

`AmazonEMRFullAccessPolicy_v2` is an AWS managed policy.

Using this policy

You can attach `AmazonEMRFullAccessPolicy_v2` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: March 12, 2021, 01:50 UTC
- **Edited time:** February 12, 2026, 17:58 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonEMRFullAccessPolicy_v2`

Policy version

Policy version: v7 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonEMRReadOnlyAccessPolicy_v2

Description: Provides read only access to Amazon EMR and the associated CloudWatch Metrics.

`AmazonEMRReadOnlyAccessPolicy_v2` is an AWS managed policy.

Using this policy

You can attach `AmazonEMRReadOnlyAccessPolicy_v2` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: March 12, 2021, 01:39 UTC
- **Edited time:** August 02, 2023, 19:15 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonEMRReadOnlyAccessPolicy_v2`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonEMRServerlessServiceRolePolicy

Description: Allows access to other AWS service resources that are required to run Amazon EMRServerless

`AmazonEMRServerlessServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: May 20, 2022, 23:15 UTC
- **Edited time:** January 25, 2024, 18:21 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonEMRServerlessServiceRolePolicy`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonEMRServicePolicy_v2

Description: This policy is used for the Amazon EMR Service Role and should NOT be used for any other IAM users or roles in your account. The policy grants permissions to create and manage resources associated with EMR and related services necessary for the operation of your EMR cluster.

`AmazonEMRServicePolicy_v2` is an AWS managed policy.

Using this policy

You can attach `AmazonEMRServicePolicy_v2` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: March 12, 2021, 01:11 UTC
- **Edited time:** February 12, 2026, 18:01 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonEMRServicePolicy_v2`

Policy version

Policy version: v6 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonEMRServicePolicyForSessions

Description: Provides permissions to provision and manage Network Load Balancers, VPC endpoint services, and security groups required for Amazon EMR Spark Connect interactive sessions on EMR on EC2 clusters.

`AmazonEMRServicePolicyForSessions` is an AWS managed policy.

Using this policy

You can attach `AmazonEMRServicePolicyForSessions` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: June 22, 2026, 19:57 UTC
- **Edited time:** June 22, 2026, 19:57 UTC

- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonEMRServicePolicyForSessions`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```

AmazonESFullAccess

Description: Provides full access to the Amazon ES configuration service.

`AmazonESFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonESFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: October 01, 2015, 19:14 UTC
- **Edited time:** October 01, 2015, 19:14 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonESFullAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [

AmazonEventBridgeApiDestinationsServiceRolePolicy

Description: Allows EventBridge to access Secret Manager resources on your behalf.

`AmazonEventBridgeApiDestinationsServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: February 11, 2021, 20:52 UTC
- **Edited time:** February 12, 2026, 17:58 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonEventBridgeApiDestinationsServiceRolePolicy`

Policy version

Policy version: v7 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```

AmazonFISServiceRolePolicy

Description: Policy to enable AWS FIS to manage monitoring and resource selection for experiments.

`AmazonFISServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: December 21, 2020, 21:18 UTC
- **Edited time:** October 25, 2022, 09:05 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonFISServiceRolePolicy`

Policy version

Policy version: v7 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonForecastFullAccess

Description: Gives access to all actions for Amazon Forecast

`AmazonForecastFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonForecastFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: January 18, 2019, 01:52 UTC
- **Edited time:** January 18, 2019, 01:52 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonForecastFullAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "forecast:*"
      ],
      "Resource" : "*"
    },
    {
      "Effect" : "Allow",

AmazonFSxConsoleReadOnlyAccess

Description: Provides read only access to Amazon FSx and access to related AWS services via the AWS Management Console.

`AmazonFSxConsoleReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonFSxConsoleReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: November 28, 2018, 16:35 UTC
- **Edited time:** February 12, 2026, 17:59 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonFSxConsoleReadOnlyAccess`

Policy version

Policy version: v8 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
```

```
  "Statement" : [
    {
      "Sid" : "FSxReadOnlyPermissions",

AmazonGrafanaCloudWatchAccess

Description: This policy grants access to Amazon CloudWatch and the dependencies needed to use CloudWatch as a datasource within Amazon Managed Grafana.

`AmazonGrafanaCloudWatchAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonGrafanaCloudWatchAccess` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: March 24, 2023, 22:41 UTC
- **Edited time:** March 24, 2023, 22:41 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonGrafanaCloudWatchAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "cloudwatch:DescribeAlarmsForMetric",

AmazonGuardDutyMalwareProtectionServiceRolePolicy

Description: GuardDuty malware protection uses the service-linked role (SLR) named AWSServiceRoleForAmazonGuardDutyMalwareProtection. This service-linked role allows GuardDuty malware protection to perform agent-less scans to detect malware. It allows GuardDuty to create snapshots in your account, and share the snapshots with the GuardDuty service account to scan for malware. It evaluates these shared snapshots and includes the retrieved EC2 instance metadata in the GuardDuty Malware Protection findings. The AWSServiceRoleForAmazonGuardDutyMalwareProtection service-linked role trusts the malware-protection.guardduty.amazonaws.com service to assume the role.

`AmazonGuardDutyMalwareProtectionServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: July 19, 2022, 19:06 UTC
- **Edited time:** January 25, 2024, 22:24 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonGuardDutyMalwareProtectionServiceRolePolicy`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonGuardDutyReadOnlyAccess

Description: Provides read only access to Amazon GuardDuty resources

`AmazonGuardDutyReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonGuardDutyReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: November 28, 2017, 22:29 UTC
- **Edited time:** November 16, 2023, 23:07 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonGuardDutyReadOnlyAccess`

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "guardduty:Describe*",
        "guardduty:Get*",
        "guardduty:List*"
      ],
      "Resource" : "*"
    },
    {
      "Effect" : "Allow",
      "Action" : [
        "organizations:ListDelegatedAdministrators",
        "organizations:ListAWSServiceAccessForOrganization",
        "organizations:DescribeOrganizationalUnit",
        "organizations:DescribeAccount",
        "organizations:DescribeOrganization",
        "organizations:ListAccounts"
      ],
      "Resource" : "*"
```

```
    }
  ]
}
```

AmazonGuardDutyServiceRolePolicy

Description: Enable access to AWS Resources used or managed by Amazon Guard Duty

`AmazonGuardDutyServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: November 28, 2017, 20:12 UTC
- **Edited time:** September 09, 2026, 21:27 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonGuardDutyServiceRolePolicy`

Policy version

Policy version: v13 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

AmazonHoneycodeTeamAssociationReadOnlyAccess

Description: Provides read only access to Honeycode Team Association via the AWS Management Console and the SDK.

`AmazonHoneycodeTeamAssociationReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonHoneycodeTeamAssociationReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: June 24, 2020, 20:27 UTC
- **Edited time:** June 24, 2020, 20:27 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonHoneycodeTeamAssociationReadOnlyAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Action" : [
        "honeycode:ListTeamAssociations"
      ],
      "Resource" : "*",
      "Effect" : "Allow"
```

```
    }
  ]
}
```

AmazonHoneycodeWorkbookFullAccess

Description: Provides full access to Honeycode Workbook via the AWS Management Console and the SDK.

`AmazonHoneycodeWorkbookFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonHoneycodeWorkbookFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: June 24, 2020, 20:28 UTC
- **Edited time:** December 01, 2020, 17:30 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonHoneycodeWorkbookFullAccess`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonInspector2AmiScanServiceRolePolicy

Description: Grants Amazon Inspector access to AWS services needed to perform security assessments for AMI

`AmazonInspector2AmiScanServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: July 30, 2026, 17:57 UTC
- **Edited time:** July 30, 2026, 17:57 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonInspector2AmiScanServiceRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

AmazonInspector2ManagedCisPolicy

Description: This is a managed policy that customer should attach to their roles to communicate with inspector service for CIS scans

`AmazonInspector2ManagedCisPolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonInspector2ManagedCisPolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: January 24, 2024, 16:31 UTC
- **Edited time:** January 24, 2024, 16:31 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonInspector2ManagedCisPolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "PermissionsForCISScans",
      "Effect" : "Allow",
      "Action" : [
        "inspector2:StartCisSession",
        "inspector2:StopCisSession",
        "inspector2:SendCisSessionTelemetry",
        "inspector2:SendCisSessionHealth"
      ],
      "Resource" : "*"
    }
  ]
}
```

AmazonInspector2ManagedTelemetryPolicy

Description: Grants permissions to communicate with Inspector2 Telemetry Channel

`AmazonInspector2ManagedTelemetryPolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonInspector2ManagedTelemetryPolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy

- **Creation time**: February 13, 2026, 17:12 UTC
- **Edited time:** February 13, 2026, 17:12 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonInspector2ManagedTelemetryPolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "PermissionsForInspector2Telemetry",
      "Effect" : "Allow",
      "Action" : [
        "inspector2-telemetry:StartSession",
        "inspector2-telemetry:StopSession",
        "inspector2-telemetry:SendTelemetry",
        "inspector2-telemetry:NotifyHeartbeat"
      ],
      "Resource" : "*"
    }
  ]
}
```

AmazonInspector2ReadOnlyAccess

Description: Provides read only access to the Amazon inspector2 service and relevant support services

`AmazonInspector2ReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonInspector2ReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: January 21, 2022, 14:45 UTC
- **Edited time:** July 07, 2026, 18:57 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonInspector2ReadOnlyAccess`

Policy version

Policy version: v9 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonInspector2ServiceRolePolicy

Description: Grants Amazon Inspector access to AWS services needed to perform security assessments

`AmazonInspector2ServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: November 16, 2021, 20:27 UTC
- **Edited time:** June 16, 2026, 19:27 UTC

- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonInspector2ServiceRolePolicy`

Policy version

Policy version: v27 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonInspector2ThirdPartyServiceRolePolicy

Description: Grants permissions for Amazon Inspector to perform actions on your behalf for multi-cloud resource scanning.

`AmazonInspector2ThirdPartyServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: June 26, 2026, 15:27 UTC
- **Edited time:** October 27, 2026, 20:37 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonInspector2ThirdPartyServiceRolePolicy`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonLaunchWizardFullAccessV2

Description: Full access to AWS Launch wizard and other required services.

`AmazonLaunchWizardFullAccessV2` is an AWS managed policy.

Using this policy

You can attach `AmazonLaunchWizardFullAccessV2` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 01, 2023, 17:14 UTC
- **Edited time:** October 20, 2026, 16:37 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonLaunchWizardFullAccessV2`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonLexChannelsAccess

Description: This policy allows customers to call Lex runtime from channels

`AmazonLexChannelsAccess` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: January 13, 2021, 20:12 UTC
- **Edited time:** January 13, 2021, 20:12 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonLexChannelsAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Action" : [
        "lex:ListBots"
      ],
      "Effect" : "Allow",
      "Resource" : "*"
    }
  ]
}
```

Learn more

- Understand versioning for IAM policies
- Get started with AWS managed policies and move toward least-privilege permissions

AmazonLexFullAccess

Description: Provides full access to Amazon Lex via the AWS Management Console. Also provides access to create Lex Service Linked Roles and grant Lex permissions to invoke a limited set of Lambda functions.

`AmazonLexFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonLexFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: April 11, 2017, 23:20 UTC
- **Edited time:** April 16, 2024, 20:06 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonLexFullAccess`

Policy version

Policy version: v9 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonLexReadOnly

Description: Provides read-only access to Amazon Lex.

`AmazonLexReadOnly` is an AWS managed policy.

Using this policy

You can attach `AmazonLexReadOnly` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: April 11, 2017, 23:13 UTC
- **Edited time:** May 13, 2024, 16:58 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonLexReadOnly`

Policy version

Policy version: v5 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonLexReplicationPolicy

Description: Allows Amazon Lex to replicate Lex resources across regions on your behalf.

`AmazonLexReplicationPolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: January 31, 2024, 23:29 UTC
- **Edited time:** June 24, 2025, 21:52 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonLexReplicationPolicy`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

AmazonMacieServiceRole

Description: Grants Macie read-only access to resource dependencies in your account in order to enable data analysis.

`AmazonMacieServiceRole` is an AWS managed policy.

Using this policy

You can attach `AmazonMacieServiceRole` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: August 14, 2017, 14:53 UTC
- **Edited time:** August 14, 2017, 14:53 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonMacieServiceRole`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
```

```
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Resource" : "*",
      "Action" : [
        "s3:Get*",
        "s3:List*"
      ]
    }
  ]
}
```

AmazonMacieServiceRolePolicy

Description: Service linked role for Amazon Macie

`AmazonMacieServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: June 19, 2018, 22:17 UTC
- **Edited time:** May 19, 2022, 19:16 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonMacieServiceRolePolicy`

Policy version

Policy version: v6 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "iam:ListAccountAliases",
        "organizations:DescribeAccount",
        "organizations:ListAccounts",
        "s3:GetAccountPublicAccessBlock",
        "s3:ListAllMyBuckets",
        "s3:GetBucketAcl",
        "s3:GetBucketLocation",
        "s3:GetBucketLogging",
        "s3:GetBucketPolicy",
        "s3:GetBucketPolicyStatus",
        "s3:GetBucketPublicAccessBlock",
        "s3:GetBucketTagging",
        "s3:GetBucketVersioning",
        "s3:GetBucketWebsite",
        "s3:GetEncryptionConfiguration",
        "s3:GetLifecycleConfiguration",
        "s3:GetReplicationConfiguration",
        "s3:ListBucket",
        "s3:GetObject",
        "s3:GetObjectAcl",
        "s3:GetObjectTagging"
      ],
      "Resource" : "*"
    },
    {
      "Effect" : "Allow",
      "Action" : [
```

```
        "logs:CreateLogGroup"
      ],
      "Resource" : [
        "arn:aws:logs:*:*:log-group:/aws/macie/*"
      ]
    },
    {
      "Effect" : "Allow",
      "Action" : [
        "logs:CreateLogStream",
        "logs:PutLogEvents",
        "logs:DescribeLogStreams"
      ],
      "Resource" : [
        "arn:aws:logs:*:*:log-group:/aws/macie/*:log-stream:*"
      ]
    }
  ]
}
```

AmazonMWAAServerlessServiceRolePolicy

Description: Provides access to Amazon Airflow Serverless Service to manage networking for your workflows and access other AWS services on your behalf

`AmazonMWAAServerlessServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: November 15, 2025, 20:34 UTC
- **Edited time:** November 15, 2025, 20:34 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonMWAAServerlessServiceRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
```

```
      "Effect" : "Allow",
      "Action" : [
        "ec2:AttachNetworkInterface",
        "ec2:CreateNetworkInterface",
        "ec2:CreateNetworkInterfacePermission",
        "ec2:DeleteNetworkInterface",
        "ec2:DeleteNetworkInterfacePermission",
        "ec2:DescribeDhcpOptions",
        "ec2:DescribeNetworkInterfaces",
        "ec2:DescribeSecurityGroups",

AmazonODBExadataInfrastructureAdmin

Description: Provides administrative access to manage Exadata Infrastructure resources in Oracle Database@AWS

`AmazonODBExadataInfrastructureAdmin` is an AWS managed policy.

Using this policy

You can attach `AmazonODBExadataInfrastructureAdmin` to your users, groups, and roles.

Policy details

- **Type**: Job function policy
- **Creation time**: August 07, 2026, 01:12 UTC
- **Edited time:** September 04, 2026, 21:27 UTC
- **ARN**: `arn:aws:iam::aws:policy/job-function/AmazonODBExadataInfrastructureAdmin`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonODBServiceRolePolicy

Description: Allows Oracle Database@AWS to manage AWS resources on your behalf.

`AmazonODBServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: November 13, 2024, 18:21 UTC
- **Edited time:** February 12, 2026, 18:02 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonODBServiceRolePolicy`

Policy version

Policy version: v10 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "CloudWatch",
      "Effect" : "Allow",

AmazonOpenSearchServerlessServiceRolePolicy

Description: Allow Amazon OpenSearch Serverless to access other AWS services such as CloudWatch APIs on your behalf.

`AmazonOpenSearchServerlessServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: November 24, 2022, 19:50 UTC
- **Edited time:** July 25, 2024, 21:19 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonOpenSearchServerlessServiceRolePolicy`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "AllowAOSSCloudwatchMetrics",
      "Effect" : "Allow",
      "Action" : "cloudwatch:PutMetricData",
      "Resource" : "*",
```

```
      "Condition" : {
        "StringEquals" : {
          "cloudwatch:namespace" : "AWS/AOSS"
        }
      }
    }
  ]
}
```

AmazonPrometheusFullAccess

Description: Grants full access to AWS Managed Prometheus resources

`AmazonPrometheusFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonPrometheusFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: December 15, 2020, 18:10 UTC
- **Edited time:** November 26, 2023, 20:16 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonPrometheusFullAccess`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
```

```
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "AllPrometheusActions",
      "Effect" : "Allow",
      "Action" : [
        "aps:*"
      ],
      "Resource" : "*"
    },
    {
      "Sid" : "DescribeCluster",
      "Effect" : "Allow",
      "Action" : [
        "eks:DescribeCluster",
        "ec2:DescribeSubnets",
        "ec2:DescribeSecurityGroups"
      ],
      "Condition" : {
        "ForAnyValue:StringEquals" : {
          "aws:CalledVia" : [
            "aps.amazonaws.com"
          ]
        }
      },
      "Resource" : "*"
    },

AmazonPrometheusQueryAccess

Description: Grants access to run queries against AWS Managed Prometheus resources

`AmazonPrometheusQueryAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonPrometheusQueryAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: December 19, 2020, 01:02 UTC
- **Edited time:** December 19, 2020, 01:02 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonPrometheusQueryAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
```

```
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Action" : [
        "aps:GetLabels",
        "aps:GetMetricMetadata",
        "aps:GetSeries",

AmazonPrometheusScraperServiceRolePolicy

Description: Provides access to AWS Resources managed or used by Amazon Managed Service for Prometheus Collector

`AmazonPrometheusScraperServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: November 26, 2023, 14:19 UTC
- **Edited time:** July 17, 2026, 08:27 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonPrometheusScraperServiceRolePolicy`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonQLDBReadOnly

Description: Provides read only access to Amazon QLDB.

`AmazonQLDBReadOnly` is an AWS managed policy.

Using this policy

You can attach `AmazonQLDBReadOnly` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 05, 2019, 18:19 UTC
- **Edited time:** July 02, 2021, 02:17 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonQLDBReadOnly`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "qldb:ListLedgers",
        "qldb:DescribeLedger",

AmazonQuickSuiteAccessPolicy

Description: Provides permissions for Amazon Quick Suite to manage its IAM Identity Center application, identity store users and groups, user subscriptions, and QuickSight resources on your behalf.

`AmazonQuickSuiteAccessPolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonQuickSuiteAccessPolicy` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: October 19, 2026, 23:57 UTC
- **Edited time:** October 19, 2026, 23:57 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonQuickSuiteAccessPolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonRDSBetaServiceRolePolicy

Description: Allows Amazon RDS to manage AWS resources on your behalf.

`AmazonRDSBetaServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: May 02, 2018, 19:41 UTC
- **Edited time:** August 07, 2024, 00:54 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonRDSBetaServiceRolePolicy`

Policy version

Policy version: v9 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

AmazonRDSCustomPreviewServiceRolePolicy

Description: Amazon RDS Custom Preview Service Role Policy

`AmazonRDSCustomPreviewServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: October 08, 2021, 21:44 UTC
- **Edited time:** February 12, 2026, 17:58 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonRDSCustomPreviewServiceRolePolicy`

Policy version

Policy version: v15 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonRDSCustomServiceRolePolicy

Description: Allows Amazon RDS Custom to manage AWS resources on your behalf.

`AmazonRDSCustomServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: October 08, 2021, 21:39 UTC
- **Edited time:** February 12, 2026, 17:57 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonRDSCustomServiceRolePolicy`

Policy version

Policy version: v19 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonRDSDataFullAccess

Description: Allows full access to use the RDS data APIs, secret store APIs for RDS database credentials, and DB console query management APIs to execute SQL statements on Aurora Serverless clusters in the AWS account.

`AmazonRDSDataFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonRDSDataFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: November 20, 2018, 21:29 UTC
- **Edited time:** November 20, 2019, 21:58 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonRDSDataFullAccess`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "SecretsManagerDbCredentialsAccess",
      "Effect" : "Allow",

AmazonRDSDirectoryServiceAccess

Description: Allow RDS to access Directory Service Managed AD on behalf of the customer for domain-joined SQL Server DB instances.

`AmazonRDSDirectoryServiceAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonRDSDirectoryServiceAccess` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: February 26, 2016, 02:02 UTC
- **Edited time:** May 15, 2019, 16:51 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonRDSDirectoryServiceAccess`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Action" : [
        "ds:DescribeDirectories",
        "ds:AuthorizeApplication",
        "ds:UnauthorizeApplication",
        "ds:GetAuthorizedApplicationDetails"
      ],
      "Effect" : "Allow",
      "Resource" : "*"
    }
  ]
}
```

AmazonRDSEnhancedMonitoringRole

Description: Provides access to Cloudwatch for RDS Enhanced Monitoring

`AmazonRDSEnhancedMonitoringRole` is an AWS managed policy.

Using this policy

You can attach `AmazonRDSEnhancedMonitoringRole` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: November 11, 2015, 19:58 UTC
- **Edited time:** November 11, 2015, 19:58 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonRDSEnhancedMonitoringRole`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "EnableCreationAndManagementOfRDSCloudwatchLogGroups",
      "Effect" : "Allow",

AmazonRDSReadOnlyAccess

Description: Provides read only access to Amazon RDS via the AWS Management Console.

`AmazonRDSReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonRDSReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy

- **Creation time**: February 06, 2015, 18:40 UTC
- **Edited time:** April 14, 2023, 12:32 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonRDSReadOnlyAccess`

Policy version

Policy version: v7 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "rds:Describe*",

AmazonRDSServiceRolePolicy

Description: Allows Amazon RDS to manage AWS resources on your behalf.

`AmazonRDSServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: January 08, 2018, 18:17 UTC
- **Edited time:** July 01, 2024, 22:42 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonRDSServiceRolePolicy`

Policy version

Policy version: v14 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonRedshiftAllCommandsFullAccess

Description: This policy includes permissions to run SQL commands to copy, load, unload, query, and analyze data on Amazon Redshift. The policy also grants permissions to run select statements for related services, such as Amazon S3, Amazon CloudWatch logs, Amazon SageMaker, or AWS Glue.

`AmazonRedshiftAllCommandsFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonRedshiftAllCommandsFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: November 04, 2021, 00:48 UTC
- **Edited time:** November 25, 2021, 02:27 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonRedshiftAllCommandsFullAccess`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonRedshiftDataFullAccess

Description: This policy provides full access to Amazon Redshift Data APIs. This policy also grants scoped access to other required services.

`AmazonRedshiftDataFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonRedshiftDataFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 09, 2020, 19:23 UTC
- **Edited time:** April 07, 2023, 18:18 UTC

- **ARN**: `arn:aws:iam::aws:policy/AmazonRedshiftDataFullAccess`

Policy version

Policy version: v5 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonRedshiftFederatedAuthorization

Description: This is an ease-of-use policy for running queries with Amazon Redshift Federated Authorization

`AmazonRedshiftFederatedAuthorization` is an AWS managed policy.

Using this policy

You can attach `AmazonRedshiftFederatedAuthorization` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: November 22, 2025, 00:04 UTC
- **Edited time:** February 12, 2026, 17:58 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonRedshiftFederatedAuthorization`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {

AmazonRedshiftFullAccess

Description: Provides full access to Amazon Redshift via the AWS Management Console.

`AmazonRedshiftFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonRedshiftFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: February 06, 2015, 18:40 UTC
- **Edited time:** July 07, 2022, 23:31 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonRedshiftFullAccess`

Policy version

Policy version: v5 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

AmazonRedshiftQueryEditorV2NoSharing

Description: Grants the ability to work with Amazon Redshift Query Editor V2 without sharing resources. The granted principal can only read, update and delete its own resources but cannot share them. This policy also grants access to other required services. This includes permissions to list the Amazon Redshift clusters and manage the Query Editor V2 secrets of the principal in AWS Secrets Manager.

`AmazonRedshiftQueryEditorV2NoSharing` is an AWS managed policy.

Using this policy

You can attach `AmazonRedshiftQueryEditorV2NoSharing` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 24, 2021, 14:18 UTC
- **Edited time:** February 21, 2024, 17:25 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonRedshiftQueryEditorV2NoSharing`

Policy version

Policy version: v9 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonRedshiftQueryEditorV2ReadSharing

Description: Grants the ability to work with Amazon Redshift Query Editor V2 with limited sharing of resources. The granted principal can read, write and share its own resources. The granted principal can read the resources shared with its team but cannot update them. This policy also grants access to other required services. This includes permissions to list the Amazon Redshift clusters and manage the Query Editor V2 secrets of the principal in AWS Secrets Manager.

`AmazonRedshiftQueryEditorV2ReadSharing` is an AWS managed policy.

Using this policy

You can attach `AmazonRedshiftQueryEditorV2ReadSharing` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 24, 2021, 14:22 UTC
- **Edited time:** February 21, 2024, 17:27 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonRedshiftQueryEditorV2ReadSharing`

Policy version

Policy version: v9 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonRedshiftQueryEditorV2ReadWriteSharing

Description: Grants the ability to work with Amazon Redshift Query Editor V2 with sharing of resources. The granted principal can read, write and share its own resources. The granted principal can read and update the resources shared with its team. This policy also grants access to other required services. This includes permissions to list the Amazon Redshift clusters and manage the Query Editor V2 secrets of the principal in AWS Secrets Manager.

`AmazonRedshiftQueryEditorV2ReadWriteSharing` is an AWS managed policy.

Using this policy

You can attach `AmazonRedshiftQueryEditorV2ReadWriteSharing` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 24, 2021, 14:25 UTC
- **Edited time:** February 21, 2024, 17:30 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonRedshiftQueryEditorV2ReadWriteSharing`

Policy version

Policy version: v9 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonRedshiftReadOnlyAccess

Description: Provides read only access to Amazon Redshift via the AWS Management Console.

`AmazonRedshiftReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonRedshiftReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: February 06, 2015, 18:40 UTC
- **Edited time:** February 08, 2024, 00:24 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonRedshiftReadOnlyAccess`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "AmazonRedshiftReadOnlyAccess",
      "Action" : [
        "redshift:Describe*",
        "redshift:ListRecommendations",
        "redshift:ViewQueriesInConsole",

AmazonRedshiftServiceLinkedRolePolicy

Description: Allows Amazon Redshift to call AWS services on your behalf

`AmazonRedshiftServiceLinkedRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: September 18, 2017, 19:19 UTC
- **Edited time:** February 19, 2025, 17:22 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonRedshiftServiceLinkedRolePolicy`

Policy version

Policy version: v15 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonRekognitionCustomLabelsFullAccess

Description: This policy specifies rekognition and s3 permissions required by Amazon Rekognition Custom Labels feature.

`AmazonRekognitionCustomLabelsFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonRekognitionCustomLabelsFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: January 08, 2020, 19:18 UTC
- **Edited time:** August 16, 2022, 20:20 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonRekognitionCustomLabelsFullAccess`

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
```

```
  "Statement" : [
    {

AmazonRekognitionFullAccess

Description: Access to all Amazon Rekognition APIs

`AmazonRekognitionFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonRekognitionFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: November 30, 2016, 14:40 UTC
- **Edited time:** November 30, 2016, 14:40 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonRekognitionFullAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",

AmazonRoute53DomainsFullAccess

Description: Provides full access to all Route53 Domains actions and Create Hosted Zone to allow Hosted Zone creation as part of domain registrations.

`AmazonRoute53DomainsFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonRoute53DomainsFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: February 06, 2015, 18:40 UTC
- **Edited time:** February 06, 2015, 18:40 UTC

- **ARN**: `arn:aws:iam::aws:policy/AmazonRoute53DomainsFullAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "route53:CreateHostedZone",
        "route53domains:*"
      ],
      "Resource" : [
        "*"
      ]
    }
  ]
}
```

AmazonRoute53RecoveryReadinessFullAccess

Description: Provides full access to Amazon Route 53 Recovery Readiness

`AmazonRoute53RecoveryReadinessFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonRoute53RecoveryReadinessFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy

- **Creation time**: August 18, 2021, 16:45 UTC
- **Edited time:** August 18, 2021, 16:45 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonRoute53RecoveryReadinessFullAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "route53-recovery-readiness:*"
      ],
      "Resource" : "*"
    }
  ]
}
```

AmazonRoute53RecoveryReadinessReadOnlyAccess

Description: Provides read only access to Amazon Route 53 Recovery Readiness

`AmazonRoute53RecoveryReadinessReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonRoute53RecoveryReadinessReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: August 18, 2021, 18:11 UTC
- **Edited time:** November 09, 2021, 20:14 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonRoute53RecoveryReadinessReadOnlyAccess`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "route53-recovery-readiness:GetCell",

Policy details

- **Type**: AWS managed policy
- **Creation time**: February 06, 2015, 18:40 UTC
- **Edited time:** September 27, 2021, 20:16 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonS3FullAccess`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "s3:*",
        "s3-object-lambda:*"
      ],
      "Resource" : "*"
    }
  ]
```

```
}
```

AmazonS3ObjectLambdaExecutionRolePolicy

Description: Provides AWS Lambda functions permissions to interact with Amazon S3 Object Lambda. Also grants Lambda permissions to write to CloudWatch Logs.

`AmazonS3ObjectLambdaExecutionRolePolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonS3ObjectLambdaExecutionRolePolicy` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: August 18, 2021, 10:07 UTC
- **Edited time:** August 18, 2021, 10:07 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonS3ObjectLambdaExecutionRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "logs:CreateLogGroup",
        "logs:CreateLogStream",
        "logs:PutLogEvents",
        "s3-object-lambda:WriteGetObjectResponse"
      ],
      "Resource" : "*"
    }
  ]
}
```

AmazonS3OutpostsFullAccess

Description: Provides full access to Amazon S3 on Outposts via the AWS Management Console.

`AmazonS3OutpostsFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonS3OutpostsFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: October 02, 2020, 17:26 UTC

- **Edited time:** October 02, 2020, 17:26 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonS3OutpostsFullAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : "s3-outposts:*",
      "Resource" : "*"
    },
    {
      "Effect" : "Allow",
      "Action" : [
        "datasync:ListTasks",
        "datasync:ListLocations",
        "datasync:DescribeTask",
        "datasync:DescribeLocation*"
      ],
      "Resource" : "*"
    },
    {
      "Effect" : "Allow",
      "Action" : [
        "ec2:DescribeVpcs",

AmazonS3ReadOnlyAccess

Description: Provides read only access to all buckets via the AWS Management Console.

`AmazonS3ReadOnlyAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonS3ReadOnlyAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: February 06, 2015, 18:40 UTC
- **Edited time:** August 10, 2023, 21:31 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonS3ReadOnlyAccess`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "s3:Get*",
        "s3:List*",
        "s3:Describe*",
        "s3-object-lambda:Get*",
        "s3-object-lambda:List*"
      ],
      "Resource" : "*"
    }
  ]
}
```

AmazonS3TablesFullAccess

Description: Provides full access to all S3 table buckets.

`AmazonS3TablesFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonS3TablesFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy

- **Creation time**: December 03, 2024, 15:21 UTC
- **Edited time:** February 12, 2026, 18:00 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonS3TablesFullAccess`

Policy version

Policy version: v6 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "s3tables:*"
      ],
      "Resource" : "*"
    },
    {
      "Sid" : "PassRoleToS3TablesReplication",
      "Effect" : "Allow",
      "Action" : [
        "iam:PassRole"
      ],
      "Resource" : "*",
      "Condition" : {
        "StringEquals" : {
          "iam:PassedToService" : [
            "replication.s3tables.amazonaws.com"
          ]
        }
      }
    }
  ]
}
```

AmazonSageMakerCanvasAIServicesAccess

Description: Provides permissions for Amazon SageMaker Canvas to use AI services to support ready to use AI solutions. This policy will add more mutating permissions for services as Amazon SageMaker Canvas adds support.

`AmazonSageMakerCanvasAIServicesAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerCanvasAIServicesAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: March 23, 2023, 22:36 UTC
- **Edited time:** November 29, 2023, 14:47 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSageMakerCanvasAIServicesAccess`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerCanvasBedrockAccess

Description: This policy grants permissions to use Amazon Bedrock in SageMaker Canvas by providing access to downstream services such as S3.

`AmazonSageMakerCanvasBedrockAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerCanvasBedrockAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: February 02, 2024, 18:37 UTC
- **Edited time:** February 02, 2024, 18:37 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSageMakerCanvasBedrockAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "S3CanvasAccess",
      "Effect" : "Allow",
      "Action" : [

AmazonSageMakerCanvasDataPrepFullAccess

Description: Provides full access to Amazon SageMaker resources and operations for data preparation in Canvas. The policy also provides select access to related services (e.g., S3, IAM, KMS, RDS, CloudWatch Logs, Redshift, Athena, Glue, EventBridge, Secrets Manager). This policy should be attached to the Amazon SageMaker Domain/User Profile execution role.

`AmazonSageMakerCanvasDataPrepFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerCanvasDataPrepFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: October 27, 2023, 22:56 UTC
- **Edited time:** August 16, 2024, 18:11 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSageMakerCanvasDataPrepFullAccess`

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerCanvasDirectDeployAccess

Description: Allows Amazon SageMaker Canvas to create, manage and view endpoint details for endpoints created through Canvas. Allows Amazon SageMaker Canvas to retrieve endpoint invocation metrics from CloudWatch.

`AmazonSageMakerCanvasDirectDeployAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerCanvasDirectDeployAccess` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: October 06, 2023, 18:11 UTC
- **Edited time:** October 06, 2023, 18:11 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonSageMakerCanvasDirectDeployAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "SageMakerEndpointPerms",
      "Effect" : "Allow",

AmazonSageMakerCanvasEMRServerlessExecutionRolePolicy

Description: This policy grants permissions to Amazon EMR Serverless for services such as S3, used by Amazon SageMaker Canvas for large data processing.

`AmazonSageMakerCanvasEMRServerlessExecutionRolePolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerCanvasEMRServerlessExecutionRolePolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: July 27, 2024, 00:35 UTC
- **Edited time:** July 27, 2024, 00:35 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSageMakerCanvasEMRServerlessExecutionRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerCanvasForecastAccess

Description: This policy grants permissions commonly needed to use SageMaker Canvas with Amazon Forecast.

`AmazonSageMakerCanvasForecastAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerCanvasForecastAccess` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: August 24, 2022, 20:04 UTC
- **Edited time:** August 24, 2022, 20:04 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonSageMakerCanvasForecastAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {

AmazonSageMakerCanvasFullAccess

Description: Provides full access to Amazon SageMaker Canvas resources and operations. The policy also provides select access to related services (e.g., S3, IAM, VPC, ECR, CloudWatch Logs, Redshift, Secrets Manager, and Forecast). This policy should be attached to the Amazon SageMaker Domain/User Profile execution role.

`AmazonSageMakerCanvasFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerCanvasFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: September 09, 2022, 00:44 UTC
- **Edited time:** August 16, 2024, 04:35 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSageMakerCanvasFullAccess`

Policy version

Policy version: v11 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerCanvasSMDataScienceAssistantAccess

Description: Provides permissions for Amazon SageMaker Canvas to use the SageMaker Data Science Assistant service. The Data Science Assistant currently uses both Amazon SageMaker and Amazon Q Developer to process user prompts.

`AmazonSageMakerCanvasSMDataScienceAssistantAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerCanvasSMDataScienceAssistantAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: December 04, 2024, 14:06 UTC
- **Edited time:** February 12, 2026, 18:02 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSageMakerCanvasSMDataScienceAssistantAccess`

Policy version

Policy version: v6 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerCapacityReservationServiceRolePolicy

Description: This policy grants permissions to Amazon SageMaker Capacity Reservations to publish CloudWatch metrics into customer accounts for utilization visibility.

`AmazonSageMakerCapacityReservationServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: April 08, 2026, 20:27 UTC
- **Edited time:** April 08, 2026, 20:27 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonSageMakerCapacityReservationServiceRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "CloudwatchPutMetricDataAccess",
      "Effect" : "Allow",
      "Action" : [

AmazonSageMakerClusterInstanceRolePolicy

Description: This policy grants permissions commonly needed to use Amazon SageMaker Cluster.

`AmazonSageMakerClusterInstanceRolePolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerClusterInstanceRolePolicy` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy

- **Creation time**: November 29, 2023, 15:11 UTC
- **Edited time:** October 16, 2026, 20:17 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSageMakerClusterInstanceRolePolicy`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```

AmazonSageMakerCoreServiceRolePolicy

Description: Managed policy for Service Linked Role for Amazon SageMaker Core Services

`AmazonSageMakerCoreServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: December 21, 2020, 21:40 UTC
- **Edited time:** December 21, 2020, 21:40 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonSageMakerCoreServiceRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
```

```
  "Version" : "2012-10-17",

AmazonSageMakerGeospatialExecutionRole

Description: This policy provide access to services that are commonly needed to use SageMaker geospatial.

`AmazonSageMakerGeospatialExecutionRole` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerGeospatialExecutionRole` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: November 30, 2022, 10:08 UTC
- **Edited time:** May 10, 2023, 20:28 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonSageMakerGeospatialExecutionRole`

Policy version

Policy version: v2 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Effect" : "Allow",
      "Action" : [
        "s3:AbortMultipartUpload",
        "s3:PutObject",
        "s3:GetObject",
        "s3:ListBucketMultipartUploads"
      ],
      "Resource" : [
        "arn:aws:s3:::*SageMaker*",
        "arn:aws:s3:::*Sagemaker*",
        "arn:aws:s3:::*sagemaker*"
      ]
    },
    {
      "Effect" : "Allow",
      "Action" : "sagemaker-geospatial:GetEarthObservationJob",
      "Resource" : "arn:aws:sagemaker-geospatial:*:*:earth-observation-job/*"
    },
```

```
    {
      "Effect" : "Allow",
      "Action" : "sagemaker-geospatial:GetRasterDataCollection",
      "Resource" : "arn:aws:sagemaker-geospatial:*:*:raster-data-collection/*"
    }
  ]
}
```

AmazonSageMakerGeospatialFullAccess

Description: This policy grants permissions that allow full access to Amazon SageMaker Geospatial through the AWS Management Console and SDK.

`AmazonSageMakerGeospatialFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerGeospatialFullAccess` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: November 30, 2022, 10:06 UTC
- **Edited time:** November 30, 2022, 10:06 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonSageMakerGeospatialFullAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerGroundTruthExecution

Description: Provides access to AWS services that are required to run SageMaker GroundTruth Labeling job

`AmazonSageMakerGroundTruthExecution` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerGroundTruthExecution` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: July 09, 2020, 19:30 UTC
- **Edited time:** April 29, 2022, 20:49 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSageMakerGroundTruthExecution`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerHyperPodGatedModelAccess

Description: This Amazon Managed Policy provides the necessary permissions for SageMaker HyperPod to access gated models in SageMaker Jumpstart. It allows creating presigned URLs for hub content in the SageMaker Public Hub.

`AmazonSageMakerHyperPodGatedModelAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerHyperPodGatedModelAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: January 17, 2026, 01:04 UTC
- **Edited time:** February 12, 2026, 18:00 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSageMakerHyperPodGatedModelAccess`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "CreatePresignedUrlAccess",
      "Effect" : "Allow",
      "Action" : [
        "sagemaker:CreateHubContentPresignedUrls"
      ],
      "Resource" : [
        "arn:aws:sagemaker:*:*:hub/SageMakerPublicHub",
        "arn:aws:sagemaker:*:*:hub-content/SageMakerPublicHub/*/*"
      ],
      "Condition" : {
        "StringEquals" : {
          "aws:ResourceAccount" : "${aws:PrincipalAccount}"
        }
      }
    }
  ]
}
```

AmazonSageMakerHyperPodInferenceAccess

Description: This policy provides administrative privileges required for setting up the SageMaker HyperPod inference operator. It enables the inference operator to access AWS networking

resources, Amazon S3, Amazon ECR, Amazon CloudWatch, AWS Certificate Manager, and SageMaker resources necessary to deploy and manage inference workloads on HyperPod clusters

`AmazonSageMakerHyperPodInferenceAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerHyperPodInferenceAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: January 27, 2026, 20:34 UTC
- **Edited time:** July 20, 2026, 20:57 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSageMakerHyperPodInferenceAccess`

Policy version

Policy version: v4 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerHyperPodInferenceGatewayAccess

Description: This policy provides the permissions required to set up and operate the SageMaker HyperPod inference gateway. It enables the gateway to manage AWS Certificate Manager (ACM) certificates for TLS termination when deploying and serving inference workloads on HyperPod clusters.

`AmazonSageMakerHyperPodInferenceGatewayAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerHyperPodInferenceGatewayAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy

- **Creation time**: September 09, 2026, 23:27 UTC
- **Edited time:** September 09, 2026, 23:27 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSageMakerHyperPodInferenceGatewayAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",

AmazonSageMakerHyperPodObservabilityAdminAccess

Description: This policy provides administrative privileges required for setting up SageMaker HyperPod observability. It enables access to Amazon Managed Prometheus, Amazon Managed

Grafana and EKS Addons. The policy also includes broad access to Grafana HTTP APIs through ServiceAccountTokens across all Amazon Managed Grafana workspaces in your account.

`AmazonSageMakerHyperPodObservabilityAdminAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerHyperPodObservabilityAdminAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: July 10, 2025, 14:37 UTC
- **Edited time:** February 12, 2026, 17:57 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSageMakerHyperPodObservabilityAdminAccess`

Policy version

Policy version: v6 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerHyperPodServiceRolePolicy

Description: This policy grants permissions to Amazon SageMaker HyperPod to related AWS services such as Amazon EKS, Amazon CloudWatch etc.

`AmazonSageMakerHyperPodServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: September 06, 2024, 17:04 UTC
- **Edited time:** September 06, 2024, 17:04 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonSageMakerHyperPodServiceRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "EKSClusterDescribePermissions",

AmazonSageMakerJobFullAccess

Description: Provides permissions for Amazon SageMaker job execution roles to access data in Amazon S3, invoke agents through Amazon Bedrock AgentCore, track experiments with MLflow,

publish model packages, write logs to Amazon CloudWatch, invoke AWS Lambda functions, and manage Amazon VPC network interfaces.

`AmazonSageMakerJobFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerJobFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: June 03, 2026, 02:42 UTC
- **Edited time:** June 03, 2026, 02:42 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSageMakerJobFullAccess`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```

AmazonSageMakerModelGovernanceUseAccess

Description: This AWS managed policy grants permissions needed to use all Amazon SageMaker Governance features. The policy also provides select access to related services (e.g., S3, KMS).

`AmazonSageMakerModelGovernanceUseAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerModelGovernanceUseAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: November 30, 2022, 08:58 UTC

- **Edited time:** June 04, 2024, 21:48 UTC
- **ARN**: `arn:aws:iam::aws:policy/AmazonSageMakerModelGovernanceUseAccess`

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerModelRegistryFullAccess

Description: This is a new managed policy for Model Registry in Sagemaker. This policy is a standalone policy that can be attached to the user role to access Model Registry related functionalities in Sagemaker.

`AmazonSageMakerModelRegistryFullAccess` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerModelRegistryFullAccess` to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: April 13, 2023, 05:20 UTC
- **Edited time:** June 06, 2024, 18:48 UTC

AmazonSageMakerNotebooksServiceRolePolicy

Description: Managed policy for Service Linked Role for Amazon SageMaker Notebooks

`AmazonSageMakerNotebooksServiceRolePolicy` is an AWS managed policy.

Using this policy

This policy is attached to a service-linked role that allows the service to perform actions on your behalf. You cannot attach this policy to your users, groups, or roles.

Policy details

- **Type**: Service-linked role policy
- **Creation time**: October 18, 2019, 20:27 UTC
- **Edited time:** April 16, 2026, 18:12 UTC
- **ARN**: `arn:aws:iam::aws:policy/aws-service-role/AmazonSageMakerNotebooksServiceRolePolicy`

Policy version

Policy version: v12 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

AmazonSageMakerPartnerAppsFullAccess

Description: Enables Amazon SageMaker partner app users to access applications, list available applications, launch application web UIs, and connect via the application SDK.

`AmazonSageMakerPartnerAppsFullAccess` is an AWS managed policy.

Using this policy

You can attach AmazonSageMakerPartnerAppsFullAccess to your users, groups, and roles.

Policy details

- **Type**: AWS managed policy
- **Creation time**: January 17, 2025, 18:37 UTC
- **Edited time:** February 12, 2026, 17:57 UTC
- **ARN**: arn:aws:iam::aws:policy/AmazonSageMakerPartnerAppsFullAccess

Policy version

Policy version: v3 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document

```
{
  "Version" : "2012-10-17",
  "Statement" : [
    {
      "Sid" : "AmazonSageMakerPartnerListAppsPermission",
      "Effect" : "Allow",
      "Action" : "sagemaker:ListPartnerApps",
      "Resource" : "*"
    },
    {
      "Sid" : "AmazonSageMakerPartnerAppsPermission",
      "Effect" : "Allow",
      "Action" : [
        "sagemaker:CreatePartnerAppPresignedUrl",
        "sagemaker:DescribePartnerApp",
        "sagemaker:CallPartnerAppApi"
      ],
      "Condition" : {
        "StringEquals" : {
```

```
          "aws:ResourceAccount" : "${aws:PrincipalAccount}"
        }
      },
      "Resource" : "arn:aws:sagemaker:*:*:partner-app/*"
    }
  ]
}

AmazonSageMakerPartnerServiceCatalogProductsApiGatewayServic

Description: Service role policy used by the AWS APIGateway within the AWS ServiceCatalog provisioned products from Amazon SageMaker portfolio of products. Grants permissions to a set of related services including Lambda and others.

`AmazonSageMakerPartnerServiceCatalogProductsApiGatewayServiceRolePolicy` is an AWS managed policy.

Using this policy

You can attach `AmazonSageMakerPartnerServiceCatalogProductsApiGatewayServiceRolePolicy` to your users, groups, and roles.

Policy details

- **Type**: Service role policy
- **Creation time**: August 01, 2023, 15:06 UTC
- **Edited time:** August 01, 2023, 15:06 UTC
- **ARN**: `arn:aws:iam::aws:policy/service-role/AmazonSageMakerPartnerServiceCatalogProductsApiGatewayServiceRolePolicy`

Policy version

Policy version: v1 (default)

The policy's default version is the version that defines the permissions for the policy. When a user or role with the policy makes a request to access an AWS resource, AWS checks the default version of the policy to determine whether to allow the request.

JSON policy document
